

MEDICATIONS:

This is verification of some of the medications taken.

Currently, exclusively taking prescribed medical cannabis for all symptoms (see current Commonwealth Medical Program ID) which, because it is not federally supported (only state), it costs about \$400.00 per month, from the \$900.00 David gets from the federal government and state combine. David has been doing cannabis since 2017, when it was first made legal in the state of Massachusetts, completely out of pocket.

Recently, June 2023, David spent several days in a psychiatric facility for attempting suicide. Because of what happened to David involving his incarceration for rapes he did not commit, and the Sex Offender Registry, David has bouts of extreme emotional distress which he has difficulty addressing.

David is currently in therapy at River Valley Counseling Center where he has been seeing a therapist for weekly sessions for many years (David has been in therapy of some type since being removed from the custody of his biological mother when he was three years old. David has recently found it necessary to have two therapy sessions to help cope with his current issues and those being brought up by pursuing this civil action.
